

TRIVANNI YADAV

Try0933@utulsa.edu
Tanuy016@gmail.com

The University of Tulsa
Tulsa, OK, 74104

Pursuing a PhD in Physics at the University of Tulsa. Working in Computational Material Science and Quantum Mechanics.

EDUCATION

- | | | |
|--------------|--|----------------|
| PhD | The University of Tulsa, Physics
Advisor: Dr. Sanwu Wang
GPA : 3.86 | May 2026 |
| MS | Central Michigan University, USA
Discipline: Physics
Project: <i>“Numerical Modeling of exoplanet light curves based on Mandel and Agol analytic model”</i>
Advisor: Dr. Christopher Tycner
GPA: 3.34 | May 2017 |
| M.Sc. | Chaudhary Charan University, India
Discipline: Physics
(1st class (Rank 3/40) with 78.7 marks) | June 2014 |
| B.Sc. | University of Delhi, India
Discipline: Applied Physical Science
(1st Class (Rank 2/50) with 61.85 marks) | September 2012 |

HONORS AND AWARDS

- | | |
|---|-----------------------|
| Graduate Assistantship Award
Department of Physics and Engineering Physics
(University of Tulsa) | August 2018 - Present |
| Distinguished Graduate Student Award (Nominated)
(University of Tulsa, Graduate School) | March 2023 |
| Chapman Distinguished PhD Fellowship
(University of Tulsa) | Summer 2022 |

Trivanni Yadav

Doctoral Administration Assistantship Award (University of Tulsa)	Summer 2021
Outstanding Teaching Assistant Award Department of Physics (Central Michigan University)	April 2017
Outstanding Teaching Assistant Award Department of Physics (Central Michigan University)	April 2016
Graduate Assistantship College of Science and Engineering (Central Michigan University)	Aug 2014-17
Merit Award – Second Position B.sc (Final Year) University of Delhi, India	2011-12
Merit Award – First Position B.sc (Second Year) University of Delhi, India	2010-11
Merit Award – First Position B.sc (First Year) University of Delhi, India	2008-09

TEACHING EXPERIENCE

Graduate Teaching Assistant, Department of Physics and Engineering Physics The University of Tulsa	Aug 2018- Present
Teaching Undergraduate level Physics Lab (PHYS 2051) average 50 students per semester majoring in Physics, Engineering and Non-Engineering. Provide in-person lectures. Regularly grade their work on Harvey Software. Set up the labs, closely work with the instruments and regularly check their efficiency.	

Course Builder and Instructor,
The University of Tulsa

May 2021

- Designed an online supplemental resource called '**Academic Refresh Course**' for **Physics 2053 (General Physics I course) on the Harvey**, which has been available to around 300 undergraduate students. This resource includes a series of Videos that includes explanations and demonstrated examples of problems on the topic that students find most challenging in this course. It basically provides the students an extra help to do well and understand the concepts of Physics I course.

Graduate Teaching Assistant,
Department of Physics
Central Michigan University

Aug 2014- May 2017

- Taught Undergraduate Level Physics Labs for calculus and algebra based introductory physics courses. Regularly grade their assignments and tests and update on Blackboard course management system and scheduled office hours every week to assist the students.

Assistant Lab Coordinator,
Department of Physics
Central Michigan University

Aug 2016- May 2017

- Assisting the PHS 265 QR - Quantitative Physical science undergraduate class (An active learning course of Basic physics for students who will be teaching in elementary school) and grade their Assignments and upload electronically on Blackboard course Management System. And Also Set up the experiments (if required) for whole class.

Physics Lab Designer,
Department of Physics
Central Michigan University

Jan 2016- May 2017

- Under this position, Set up the whole Lab for specific Experiments for around 24 students per class (PHY 170/175)University Lab course.

PROFESSIONAL ASSOCIATION

Sigma Pi Sigma, Member

2017-Present

American Astronomical Society, Member,

2016-Present

American Physical Society, Member

2015-Present

WORKSHOPS

Attended “Python Tools for Structure-Informed Prediction of Formation Energy using Neural Networks ” (Virtual workshop , organized Materials Genome Foundation)	March 2, 2023
Attended, “Electronic correlation from first principles” (Online VASP workshop , organized by VASP Software GmbH)	November 15-18, 2022
Attended “Moving ions with VASP.” (Online VASP workshop , organized by VASP Software GmbH)	September 27-30, 2022
Attended “2022 summer school on electron-phonon physics from the first principles” (Held at University of Texas, Austin) Sponsored by NSF	June 13- June 20, 2022

RESEARCH PRESENTATIONS

Research-colloquium (University of Tulsa)	Scheduled (March 2023)
--	-------------------------------

LANGUAGES

English: Full Professional Proficiency

Hindi: Native Proficiency

COMPUTER SKILLS

Programming: FORTRAN, Python

Applications: Word processors, Spreadsheet program, gnu/Linux, LATEX

Software: VASP, Origin

RESEARCH PAPERS (TO BE SUBMITTED)

Shi-Yu Liu, Huilun Zhang, Changming Liu, Shiyang Liu, Dejun Li, Zhiqiang Niu, **Trivanni Yadav**, Deependra Shah, Sanwu Wang, (2023) *High throughput first-principles mixing thermodynamics design of super hard high-entropy diborides*, Manuscript to be submitted, Department of Physics and Engineering Physics, The University of Tulsa, Tulsa, Oklahoma 74104, USA.
